

Allegion's Overtur™ is a cloud-based suite of tools where architects and door hardware consultants can come together to collaborate on the specifications and the security design of doors and openings.

Overtur provides a variety of applications ('apps') to accomplish such tasks as:

Upload door data, schedules and plans directly from a Building Information Model (BIM).

Review designs in an online environment where you can easily capture decisions and requirements about your project's hardware.

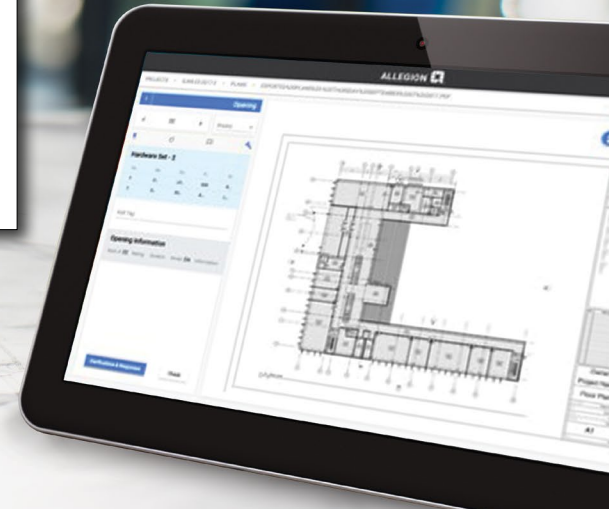

Transfer door data - including electrical requirements - to and from Allegion to help shorten the specification cycle.

Graphically track and review the important changes to openings and hardware selections.

Improved collaboration, coordination, and productivity. Overtur can simplify the process of specifying door hardware on your next project. To learn more, visit discover-overtur.allegion.com or call 877-545-4464. Or contact an [Allegion specification consultant](#).

About Allegion

Allegion (NYSE: ALLE) is a global pioneer in safety and security, with leading brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®.
